Customers Like You: Contribution Log

Project: PCA vs. Truncated SVD for Customer-Product Recommendations
Dataset: UCI Online Retail II

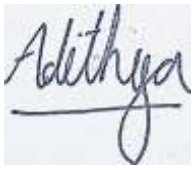

Contributor

Name: Adi Anand

Project activity	Contribution
Data preparation	Cleaned the dataset and prepared the chronological training and test split.
Matrix construction	Built the customer-product matrix and documented its sparsity and storage requirements.
PCA and Truncated SVD	Ran experiments and compared explained variance, reconstruction error, fitting time and storage.
Recommendation evaluation	Evaluated Hit Rate@10 against the best-seller baseline.
Customer segmentation	Generated and profiled five exploratory customer groups and created the customer map.
Documentation and presentation	Prepared the analysis notebook, README, project memo and presentation.

Declaration: I confirm that the contributions listed above accurately represent the work I completed for this project.
